

UFCW 663 Jerry's Negotiations Update

March 31, 2025

THE GOOD

Jerry's last offer in negotiations:

- 1. Full-Timers at top and above scale get \$1/hr raise each year, new Classified Assistants hired after March 2025 will have a higher starting wage scale, no change to wage scales for existing full-timers - will progress annually on existing wage scales.
- 2. Part-Timers at \$19.10+ (top and above scale), get \$0.70/hr raise each year.
- 3. All Part-Timers the company finally agreed to our Union proposal and will maintain part-time raises every 6 months. Almost 2,000 members across employers signed petitions to support part-timers and the company heard it.
- 4. The company is offering to "smooth the transition" as they shift more healthcare costs onto workers by temporarily putting \$ into HRA accounts.
- 5. Jerry's moved to proposing a 3 year contract (not 4 years)

THE BAD

Some surprises that Jerry's is holding firm on:

- 1. Language that if you get any unscheduled raise (whether for doing a good job, minimum wage goes up, or otherwise) your next scheduled raise is decreased or skipped.
- 2.For part-timers No to more guaranteed hours and no change to the existing scale, which starts at \$13.75. When was the last time the company hired someone at \$13.75?
- 3. There are no increases to the 401(k) and no offer to give it to anyone who does not currently get it.

Jerry's is adamant about moving to tiers on healthcare. We estimate **this change will save them nearly \$200,000 per** year. Where is that money going?

THE UGLY

- 1. Jerry's proposal to go to a 90%/10% cost share will drastically limit our future ability to keep healthcare affordable.
- 2. Those who need family coverage in the next contract are projected to pay over \$70 per week.
- 3. The company is proposing to use our Health Fund reserves to save them money and keep rates artificially low for this contract. This means **rates will**, **by default**, **spike MUCH higher after this contract**. How do we maintain good, affordable healthcare this way?
- 4. The potential upside for the company? **Pay less \$ on fewer people by making coverage less affordable for families.** The company keeps saying at the table, "we want to drive behavior."

	Weekly Cost for Employees
